ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: SEPARATION OF SUGARS, SUGAR ALCOHOLS, CARBOHYDRATES AND MIXTURES THEREOF

(57) Abstract: The present invention relates to a method of separating sugars and sugar alcohols from each other. More particu-
larly the present invention relates to the use of a weakly basic anion exchange resin in a chromatographic separation process. The
advantage of the present invention compared with the prior art is that it is especially suitable for separating reducing sugars in acidic
conditions as well as for example in weakly acidic conditions. The method using chromatographic separation comprises at least one
step where a weakly basic anion exchange resin is used in a chromatographic column or in a part of a column.
